

TESTIMONY: THE ILLUSION OF SECURITY AND THE MANDATE FOR SYSTEMIC CHANGE

Date: February 1, 2026

Author: Olivier Colle

Subject: National Security, Financial Integrity, and Project 999

1. Infiltration of UFO Building 33 and the Ghent University Complex

"I have personally demonstrated that current physical security is merely an illusion. For two weeks, I resided undetected within the **UFO Building (Ghent University)**. Even after eventually being removed from that specific building, security and police officers asked me what my 'Plan B' was. My Plan B was simply moving to another university location merely 80 meters away, where I stayed for the entire Christmas holiday and beyond.

During this period, I operated with total freedom:

- **Technical Ingenuity:** I built a complete, functional bicycle from two abandoned bikes and actually cycled inside the university buildings.
- **Laboratory Access & Research:** I discovered energy laboratories with functioning industrial ovens and walked through various high-tech labs wearing only my woolen crocodile slippers. On the first floor, I slept near a vintage fighter jet engine; studying the fine details of its mechanics led to insights into fine-tuning and alternatives for the energy markets.
- **Multilayered Discovery:** While the first floor offered technical breakthroughs, other floors provided different experiences in knowledge. I recall several instances where I encountered people while wearing my crocodile slippers, yet my presence remained unchallenged. At night, I was able to heat my food at the reception desk of the UFO building.
- **Stage & Technology:** I stood in the center of the stage in the UFO Conservatory, where I was able to activate professional production equipment, including computers and screens.

I maintained my operational base by concealing my camera and equipment in a strategic opening in the ceiling. While security personnel passed within meters of my location, I remained completely unnoticed. This proves that our most 'secure' institutions are fundamentally unprotected."

2. Vulnerability of National Infrastructure

"I have proven how easily our physical security can be bypassed by removing a door lock within minutes. This serves as undeniable evidence that multi-billion dollar investments in defense and international 'tough talk' are futile when the fundamental security of our own crucial institutions remains as porous as a sieve. We are neglecting our national security and IT infrastructure while being distracted by global posturing."

3. Documented Evidence and the 'Invisible Alliance'

"I have fully documented these experiences on video and photography—ranging from the security breaches in Ghent to the incidents at Teleperformance in Lisbon. I view my experiences with surveillance, hacking, and the elevator incident in Lisbon as clear warnings. I am convinced that an 'Invisible Alliance' is guiding me to trust in my vision for a fair and flawless system. Strategic events occurring while I work and discover point towards important infrastructure targeted by this alliance. This is an irrefutable dossier of evidence, showing that the vulnerabilities I uncover are part of a much larger, coordinated reality."

4. Vision on Defense and the Immediate Cessation of Support

"I state that billion-dollar military support must end with immediate effect. In this, I align myself with the vision of Bart De Wever and several other European leaders who recognize that continuing this conflict in its current form leads nowhere. The billions that will be liberated (such as the reserved €3 billion per year) must be redirected toward our own national security and technological sovereignty. Instead of investing in a dead-end struggle, the government must hire more in-house IT professionals to end our dependency on foreign corporations and close our digital backdoors."

5. My Numerological Mandate and the Sequence of 9

"The execution of my mandate is guided by numerological sequences that consistently appear on documents, financial accounts, visuals, and sightings. This guidance manifests through both external observation and my own intuition, which I aim to transform into a form of telepathy.

This mandate has been officially acknowledged. 'Het Huis voor Klokkenuiders' (The Whistleblowers Authority) in the Netherlands was formally notified on **October 1, 2025**, of the facts regarding Teleperformance and its impact on national security. In their official correspondence, they confirmed these numerological synchronicities. This includes the specific exercise where sequences and codes are reduced to the numbers **9, 99, 999**, serving as validation that the current system has reached a complete dead end (*dood spoor*). This confirmation marks the necessity for a transition to a faultless system based on universal constants."

6. The Homeless Quest: 'Cold Feet'

Insights into Human Endurance and Survival "This entire experience was part of my 'Homeless Quest', where I lived the lives of the homeless and the poor. I learned firsthand how to survive harsh winter conditions entirely on my own, without even being recognized as homeless by those around me.

'Cold Feet' represents more than just the physical struggle of surviving -10°C temperatures without shelter; it symbolizes the gap between theoretical politics and the raw, frozen reality of the streets. This journey provides a deep understanding of the complex realities and hardships people endure—knowledge that is often completely missing from the political arena. My endurance of these conditions serves as a bridge between high-level strategy and the raw human struggle. It is this unique perspective that fuels my commitment to a fair financial system and a digital basic income; I have felt the gaps in the system that leaders in ivory towers simply cannot see."
